CONSTRUCTION NOTICE

Nicor Gas Main Replacement From Hillgrove Avenue to Brewster Brainard Avenue to Ashland Avenue

April 30, 2015

Dear Residents and Property Owners:

The Village would like to advise residents that Nicor Gas has submitted plans to the Village to replace gas mains in the area from Hillgrove Avenue to Brewster Avenue and from Brainard Avenue to Ashland Avenue. Nicor is replacing aging gas mains and other gas infrastructures in this area as part of an infrastructure improvement program called Investing in Illinois: A Nicor Gas System Improvement Initiative. This work is expected to start in May/June and be completed by the end of the summer.

The scope of work will include replacement of aging gas mains, moving meters from the inside of homes to the outside, upgrading storage systems and improving the gas pressure delivery system. Generally, new gas mains and services will be installed on each block and to each home through a process called directional boring. Directional boring is a trenchless technology that reduces the amount of open cut excavation and subsequent restoration. Additional information regarding the gas main installation and impact on private gas service will be provided by Nicor closer to when this work is planned to occur.

Thank you in advance for your patience and cooperation. We will work with Nicor Gas as much as possible to minimize the inconveniences associated with this project. Should you have any questions about the project please contact the Nicor construction supervisor, Jason Jarka at (630) 317-1749. Nicor can also be reached by calling their Investing in Illinois hotline number at (630) 388-3333 or by visiting their website at www.nicorgas.com/residential/work-in-your-neighborhood. Alternatively you can also call the Department of Public Works at (708) 579-2328 with any questions, comments or concerns.

Sincerely,
VILLAGE OF LA GRANGE

Ryan Gillingham, P.E.
Director of Public Works
