

MapOffice™ Release

Press Release

Last year the Village of La Grange became the 26th member of the GIS Consortium, an organization consisting of 31 local governments that share resources, information, staffing and technology for Geographic Information Systems (GIS).

As part of the GIS Consortium membership, the Village of La Grange is releasing a browser-based mapping application known as MapOffice™. MapOffice™ provides residents the ability to view detailed property information as well as interact with the Village's robust GIS data inventory through an interactive map environment. MapOffice™ offers an easy-to-use address search function and property information tool called Parcel Summary. The Parcel Summary tool offers various information including garbage and recycling pickup days, school district, and zoning information.

To search an address or utilize the many tools available in MapOffice™, please visit the Village's website at www.villageoflagrange.com/index.aspx?nid=395.

If you have any questions or comments regarding this application please contact Ryan Gillingham at rgillingham@villageoflagrange.com.
